

Elimination is the key

The elimination of the Vertebral Subluxation Complex can produce *better spinal function every time*. The spinal muscles, spinal ligaments, spinal joints, cartilage and spinal discs can become healthier. There can be an improvement in posture and in body balance. There is a slowing, stopping, or in some cases a reversal of Subluxation Degeneration.

The elimination of the Vertebral Subluxation Complex can produce *better whole body function every time*. There can be better spinal health, better nerve system health and better organ, system and tissue health. Attitudes and outlook can improve. Chances are, you will not get diseases and symptoms that you would have been the victim of.

The elimination of the Vertebral Subluxation Complex can produce *improvement of the spine and whole body function, improving whole body health, resulting in better healing...a better expression of life...an increase in wellness and a better world*.

It simply makes good sense to correct the Vertebral Subluxation Complex, the interference between the brain and the cells of your body, allowing you to heal naturally, to be all the person you are capable of being, rather than waiting for symptoms and sickness to appear. Chiropractors are the only health care professionals specifically trained to locate and correct the Vertebral Subluxation Complex and also to help you prevent it from occurring in the future.

So don't let the tragedy of the Vertebral Subluxation Complex devastate and destroy your life or the life of your family. Have your Chiropractor determine the degree of Vertebral Subluxation Complex and the phase of Subluxation Degeneration in your spine and your children's spine. Then do something about it!! Vigorously pursue corrective care. Don't wait until you become a negative disease statistic.
